

Inter 4 • Test 2 Review

UNITS 8 & 9

Review of word formation, phrasal verbs, fashion and language vocabulary, relative pronouns, wh- clauses, gerunds and the passive.

NAME _____

DATE _____

GROUP _____

A Complete the sentences with the correct form of the verb in parentheses.

- 1 Marta is really interested in _____ (**attend**) the design workshop at the museum.
- 2 Instead of _____ (**wear**) his old sneakers, Daniel borrowed his brother's boots.
- 3 The kids are looking forward to _____ (**make**) pizza at their grandmother's house on Sunday.
- 4 After comparing three phones online, Leo ended up _____ (**buy**) the cheapest one.
- 5 Priya was so worried about _____ (**fail**) her driving test that she couldn't sleep.

B Choose the correct words to complete the conversation.

Lena: It's a formal wedding, Bruno. Are you going to dress 1. *down / up* for it?

Bruno: Of course. Last year I wore jeans to a work dinner and felt totally 2. *under / down* dressed. Everyone else had a jacket on.

Lena: Maybe this time you could make a fashion 3. *code / statement* with a bright tie?

Bruno: You know I don't 4. *follow / make* fashion. I just want to look neat.

Lena: Well, wide-leg pants are 5. *up / in* fashion again this year, so you could try a pair of those.

C Complete the sentences with the correct word from the box.

TO OUT AGAINST UP FOR

- 1 The new principal came up _____ a lot of resistance when she tried to change the timetable.
- 2 Watch _____ for ice on the steps this morning – they're really slippery.
- 3 Grandpa walks so fast that I can hardly keep _____ with him!
- 4 Which athlete did you look up _____ when you were a teenager?
- 5 The airline gave us free meals to make up _____ the six-hour delay.

D Circle the correct word to complete the sentences.

- 1 My boss says "disruptive" in every meeting – it's his favorite *abbreviation / buzzword*.
- 2 In your essay, find a *synonym / slang* for "awesome" that sounds more academic, like "impressive."
- 3 Sorry about that call last night – I didn't mean to ring you. I must have *photobombed / pocket-dialed* you.
- 4 "Laser" is an *acronym / initialism* because people pronounce it as one word.
- 5 Our class picture is ruined! A dog ran in front of the camera – what a *pocket-dial / photobomb*!

E Read the text and choose True or False.

Thinking in Silicon

For decades, people have wondered whether computers will ever think the way humans do. Now that AI tools appear in our phones, cars and classrooms, the question feels more urgent than ever – yet the experts still disagree.

Some engineers believe the gap is closing fast. Modern AI systems are trained on enormous collections of text and images, and the networks inside them are loosely modeled on the brain's neurons. Engineers often borrow words from biology, saying that a system “learns” or “remembers,” and they point to impressive results: programs that translate speech instantly, or robotic hands that can pick up an egg without breaking it.

Many brain scientists are less impressed. A child can recognize a cat after seeing just one or two, they note, while an AI system may need thousands of examples. A human brain also runs on about as much energy as a dim light bulb, whereas training a large AI model can use as much electricity as a small town. Most importantly, nobody has shown that any machine actually understands what it is doing.

Even so, the two fields are learning from each other. Studying AI has given scientists new ideas about how memory might work, and discoveries about the brain have inspired better computer designs.

Whether machines will one day match us remains an open question. For now, the most powerful thinking machine we know of is still the one inside our heads.

- | | | |
|---|--|-------|
| 1 | All experts agree that computers will soon think like humans. | T / F |
| 2 | Engineers sometimes describe AI systems with words connected to living things. | T / F |
| 3 | An AI system usually needs more examples than a child to recognize an animal. | T / F |
| 4 | Brain scientists believe machines already understand the tasks they perform. | T / F |
| 5 | The writer suggests that the human brain is still more powerful than any computer. | T / F |

F Check (✓) the correct sentence in each pair.

- | | | |
|---|---|--|
| 1 | ☐ a. How will the new school uniforms be paid for? | |
| | ☐ b. How the new school uniforms be paid for? | |
| 2 | ☐ a. Plastic bags won't given out at the checkout anymore. | |
| | ☐ b. Plastic bags won't be given out at the checkout anymore. | |
| 3 | ☐ a. These shoes aren't design in Italy – they're only sold there. | |
| | ☐ b. These shoes aren't designed in Italy – they're only sold there. | |
| 4 | ☐ a. The old bridge won't be repaired until next spring. | |
| | ☐ b. The old bridge won't repair until next spring. | |
| 5 | ☐ a. Most of the vegetables at this market grown by local farmers. | |
| | ☐ b. Most of the vegetables at this market are grown by local farmers. | |

G Complete the sentences with the correct verb form of the nouns in parentheses.

Example: The chef will **demonstrate** (*demonstration*) how to fold the dumplings.

- 1 A good coach knows how to _____ (**motivation**) players after a bad defeat.
- 2 Please don't _____ (**criticism**) the new intern in front of the whole office.
- 3 Loud thunder can _____ (**fright**) dogs, so keep yours indoors during storms.
- 4 In her speech, the principal wanted to _____ (**emphasis**) the importance of reading every day.
- 5 If both teams _____ (**cooperation**), the project will be finished by June.

H Choose the correct relative pronoun to complete each sentence.

- 1 My aunt, *who / that* works as a nurse, often does night shifts.
- 2 The song *who / that* won the contest was written by a 15-year-old.
- 3 Electric scooters, *that / which* are popular with students, are now banned on sidewalks.
- 4 Students *who / which* finish the test early may leave quietly.
- 5 The old city library, *which / who* opened in 1902, is closing for repairs.

I Fill in the gaps with the verbs in the box.

LIFT SCAN PRESS UNLOCK TWIST

- 1 Don't try to _____ the TV by yourself – it's much too heavy for one person.
- 2 You can _____ your phone with your fingerprint or a six-digit code.
- 3 To open the jar, hold it firmly and _____ the lid to the left.
- 4 At the museum entrance, _____ the QR code on your ticket with your phone.
- 5 If the printer freezes, _____ and hold the power button for ten seconds.

J Choose the correct words to complete the email.

Hi, Theo,

Great news about Lisbon! But I still don't understand (1) *what / why* you didn't call me before you booked the flight! I'd also love to know (2) *when / what* made you choose Portugal. Was it the food? Anyway, a bit of advice: (3) *where / what* you choose to live is really important, because the neighborhoods are very different. I'm also curious to see (4) *how / what* quickly you'll pick up Portuguese – you've always been good with languages. I'll come and visit (5) *when / why* I finish my exams in December.

Write soon!

Marina

K Read the text and decide if the sentences are True or False.

Old Clothes, New Ideas

Every few years, styles from the past return to the stores: flared jeans, oversized jackets, chunky sneakers. Some critics say this proves fashion has run out of ideas. A closer look, however, shows a more interesting picture.

While shapes and styles often repeat, the way clothes are made keeps changing. Two hundred years ago, a tailor could take several days to sew a single shirt by hand. The sewing machine, introduced in the nineteenth century, cut that time to under an hour and made new clothes affordable for working families for the first time.

Today, the most exciting changes are happening in materials. Scientists have developed fabrics made from mushrooms, orange peel and even recycled fishing nets. Some sports brands now sell jackets that adjust to body temperature, and a few designers are experimenting with clothes that can be 3D-printed at home.

Not everyone is convinced. Many shoppers still choose cotton and wool because they trust them, and new materials are often expensive. In addition, most clothing factories still use traditional methods, because replacing their machinery costs a lot of money.

So is fashion moving forward or going round in circles? Perhaps it's doing both. The clothes on the catwalk may look familiar, but what they're made of – and how they're produced – could be completely new.

- | | | |
|---|---|-------|
| 1 | Some critics believe that returning styles show a lack of new ideas in fashion. | T / F |
| 2 | Before the sewing machine, ordinary families could easily afford new clothes. | T / F |
| 3 | All new fabrics are made from recycled materials. | T / F |
| 4 | New materials can cost more than traditional ones. | T / F |
| 5 | The writer thinks fashion is repeating the past and changing at the same time. | T / F |

L Choose the word that completes each compound noun.

- Workers on the production *line* / *designer* check every bottle before it leaves the factory.
- The young fashion *designer* / *cleaner* was nervous before her first show in Milan.
- Street *bottles* / *cleaners* start work before sunrise so the city looks tidy by 8 a.m.
- Stores add a big markup, so retail *prices* / *processes* are often double the factory cost.
- The manufacturing *concept* / *process* for a single smartphone involves over a hundred steps.
