- The new bridge frame is made of high-grade _____ designed to last over a century.

D Unscramble the letters to make words. The first and last letters are given.

Example: The **NIONVETNI** of the light bulb changed how people lived at night. → **invention**

- The development team introduced several **MIVEPOTRNEMS** based on user feedback. → i _____ s
- Electric vehicles represent a **JAORM** shift in how we think about transportation. → m _____ r
- The amount of energy wasted in older buildings is simply **NSEMORUO**. → e _____ s
- He was **TIPCRLAURLYA** impressed by how fast the AI improved. → p _____ y
- The **ECARTNOI** of the printing press in the 15th century changed history forever. → c _____ n

E Complete with the correct conditional form (zero, first, or second).

*Example: If it rains tomorrow, we **will stay** (stay) at home.*

1. If sunlight _____ (hit) a solar panel at the right angle, it produces maximum electricity.
2. Unless governments _____ (reduce) carbon emissions soon, global temperatures will keep rising.
3. If there _____ (be) less single-use plastic in supermarkets, we would produce far less waste.
4. If I _____ (win) a research grant, I would study the long-term effects of ocean pollution.
5. If the city _____ (invest) in a reliable public transportation network, far fewer residents would drive to work.

F Complete the sentences with the correct verbs from the box.

CREATE · SAVE · ALLOW · REDUCE · PROVIDE · PAY

*Example: Turning off the lights when you leave a room can **save** a lot of energy.*

1. The regional authority plans to _____ hundreds of new jobs in the renewable energy sector.
2. Installing energy-efficient windows can significantly _____ the amount of heat lost in winter.
3. The factory was ordered to _____ compensation to the families affected by the chemical spill.
4. Strict local rules do not _____ heavy trucks on residential streets after 10 p.m.
5. The new community center will _____ residents with space for meetings, classes, and cultural events.

G Complete the sentences with the past perfect form of the verbs in parentheses.

*Example: Before I bought my new smartphone, I **had never used** (never / use) a touchscreen device.*

1. By the time the support team arrived, the volunteers _____ (already / find) a temporary solution.
2. He _____ (never / own) a laptop before his university gave him one as part of the scholarship.
3. I _____ (not think) much about data privacy until I read about a large-scale security breach.
4. When the semester ended, several students _____ (still / not submit) their final assignment.
5. By 2010, social media _____ (already / change) the way most people kept in touch with friends.

H Add -able, -ible, -less or -ful to the words in parentheses.

*Example: Don't be so **careless** (care) with your new phone — you'll break it!*

1. The footage of the volcanic eruption from inside the crater was absolutely _____ (incred).
2. Everyone at the shelter felt genuinely _____ (thank) for the donations that arrived after the storm.
3. After three failed harvests in a row, the farming community began to feel completely _____ (hope).
4. The awareness campaign proved highly _____ (success) in cutting plastic bag use across the region.
5. A project manager must be _____ (cap) of staying calm and making clear decisions under pressure.

I Complete the climate words. Write one letter on each line.

Example: Burning coal and oil puts a lot of **carbon** dioxide into the air.

1. If the Arctic ice continues to m _ _ _ at the current rate, many coastal cities will flood.
2. Even a rise of a single d _ _ _ _ in average global temperature can disrupt entire ecosystems.
3. Increasingly severe w _ _ _ _ _ events are now one of the clearest signs of climate change.
4. Greenhouse gases t _ _ _ heat in the lower atmosphere and stop it from escaping into space.
5. A huge f _ _ _ _ _ _ _ _ swept through the national park last fall, destroying thousands of trees.

J Complete the text with the correct adjective form of the words in parentheses.

Example: Many people feel **0. thrilled** (thrill) when they watch a rocket launch.

Space exploration is one of the most **1.** _____ (excite) fields of modern science. Missions that once seemed beyond reach are now becoming reality. Of course, many citizens are **2.** _____ (worry) about the enormous cost of these projects, and wonder whether the money could be better spent on challenges here on Earth. Still, it is hard not to feel **3.** _____ (amaze) when you watch live footage of a spacecraft touching down on another planet. On quiet evenings, people listening to **4.** _____ (relax) music and gazing at the night sky find the thought of human life beyond Earth strangely comforting. Perhaps, as long as people feel **5.** _____ (entertain) and inspired by what they see, public support for space exploration will remain strong.

K Read the text and choose the correct answers (a, b, or c).

A Greener Way to Keep Cool

In many hot cities, air conditioners are a big part of the climate problem. They use a lot of electricity, and on the hottest days the power grid can barely keep up. In Medellín, Colombia, the city tried a different idea. Instead of buying more machines, it planted trees.

Since 2016, workers have planted thousands of trees and plants along busy roads and streams. People call these places "green corridors." Before the project started, some of these streets were among the hottest places in the city. Today, they are about two degrees cooler, and many people walk or cycle there instead of taking the bus.

The project also created jobs. The city trained gardeners from poor neighborhoods, and many of them had never had a regular job before. Their work doesn't end with planting: they also take care of the trees for years afterwards.

Not everyone was happy at first. Some shop owners worried that roots would damage the sidewalks, and drivers complained about losing parking spaces. However, most of them changed their minds after the first hot summer.

Other cities, from Paris to Melbourne, are now studying Medellín's corridors. Experts say trees alone cannot solve global warming, but they can make life in a hot city much more bearable.

1. According to the writer, air conditioners ...
 - a. are the only cause of climate change.
 - b. use a lot of electricity.
 - c. are not used in Medellín.
2. Since the project started, some streets are ...
 - a. about two degrees cooler.
 - b. too dark to walk along at night.
 - c. more expensive to live on.
3. In paragraph 3, the word *Their* refers to ...
 - a. the trees.
 - b. the gardeners.
 - c. the neighborhoods.
4. At first, some shop owners thought the trees ...
 - a. would bring more customers.
 - b. would make the streets too dark.
 - c. might damage the sidewalks.
5. The text suggests that ...
 - a. trees alone can stop global warming.
 - b. no other city has tried green corridors.
 - c. other cities may copy Medellín's idea.
