

Intermediate 4 • Test 1 Review

UNITS 6 & 7

Review of Units 6 and 7 — vocabulary, grammar and reading.

NAME _____

DATE _____

GROUP _____

A Complete the sentences with the correct form of the word in parentheses.

Example: Crops can be **genetically** (gene) modified so that they survive long droughts.

- Nurses need solid _____ (medicine) training before they can work in the lab.
- It's his _____ (curious) about how magnets work that makes him ask so many questions.
- Which _____ (science) journal do you trust the most?
- Her younger brother was the main _____ (benefit) of the research scholarship.
- The _____ (discover) of penicillin changed hospital treatment forever.

B Check (✓) the correct sentence in each pair.

Example: a. The guide asked us to wait by the entrance. ✓ b. The guide asked to wait by the entrance.

- The coach encouraged her training every morning. ____
 - The coach encouraged her to train every morning. ____
- The pilot warned the passengers to stay in their seats. ____
 - The pilot warned the passengers stay in their seats. ____
- Visitors are not permitted touching the equipment. ____
 - Visitors are not permitted to touch the equipment. ____
- He wished he had shown Marta the photos from the trip. ____
 - He wished he had shown the photos from the trip Marta. ____
- I didn't expect them bring such a big gift. ____
 - I didn't expect them to bring such a big gift. ____

C Complete the sentences with the correct words from the box.

ROUGH • JET • SHOESTRING • LIGHT • EXPLORE • HIT

Example: Diego saved very little money, so he has to travel on a **shoestring**.

- My cousin wants to _____ the globe before she turns thirty.
- We'll have to _____ it in the mountains — there are no hotels up there.
- If we don't _____ the road soon, we'll miss the ferry.
- I always travel _____ so I never have to wait at baggage claim.
- In August they plan to _____ off to somewhere cool and quiet.

D Write the verbs in the correct conditional form (zero, first, second or third).

Example: Their results would have been valid if the team **had recorded** (record) the data correctly.

- If I _____ (have) more time, I'd volunteer at the observatory.
- She wouldn't have missed the lecture if someone _____ (remind) her.
- If you leave ice in the sun, it _____ (melt).
- The team _____ (publish) the results next month if the funding arrives.
- If the students hadn't practiced, they _____ (not finish) the project on time.

E Read the sentences and choose True or False.

Example: To launch a product means to make it available to buyers for the first time. **T**

1. The end-user is the person who finally uses a product. **T / F**
2. A celebrity endorsement is a famous person's public complaint about a brand. **T / F**
3. A forecast is a statement about what is likely to happen in the future. **T / F**
4. When a company wants to boost sales, it aims to sell fewer products than before. **T / F**
5. Product placement is when a brand's product appears inside a movie or a TV show. **T / F**

F Complete with a modal from A and a verb from B. Use each word only once.

A **MUST NOT · COULDN'T · ~~MIGHT~~ · MAY · MIGHT NOT · MUST**

B **VISIT · ~~FEEL~~ · SPRAIN · CATCH · READ · LOSE**

Example: Ana **might have felt** nervous before the interview. She often is.

1. Bruno came back with a souvenir from the Louvre, so I'm sure he _____ Paris.
2. Helena _____ her passport — that's impossible. I saw it in her hand at the gate.
3. Luís still isn't here. Maybe he overslept. He _____ the early bus.
4. Rita always answers right away, so I'm almost sure she _____ my message yet.
5. My ankle hurts a little. I _____ it while I was running, but I really don't remember.

G Read the text and choose True or False.

Women at the Edge of Science

Ask most people to name a famous scientist and they will probably mention a man. That answer says more about who gets written about than about who does the work. Behind many well-known discoveries there are women whose names almost disappeared from the record.

Take Alice Ball, a young chemist in Hawaii. In 1915 she developed a way of preparing an oil that made the first effective treatment for leprosy possible. She died the following year, aged only twenty-four, and a colleague published the method under his own name. It took nearly ninety years for her university to honor her properly.

Or consider Chien-Shiung Wu, a physicist who left China to study in the United States. Her careful experiments in 1956 proved that a law physicists had accepted for decades was simply wrong. The two theorists who had suggested the idea received the Nobel Prize; Wu did not.

More recently, Tu Youyou spent years reading old medical texts before isolating a compound from a plant that now saves hundreds of thousands of lives from malaria every year. She had no doctorate and no training abroad, and for a long time her work was published without her name on it.

None of these women worked alone, and none of them expected fame. But their stories suggest that the history of science we are taught is still incomplete.

1. Alice Ball was given credit for her discovery during her lifetime. **T / F**
2. The writer suggests that scientists become famous partly because of who writes about them. **T / F**
3. Chien-Shiung Wu shared the Nobel Prize with the two theorists. **T / F**
4. All of the women in the text worked without any help from colleagues. **T / F**
5. Tu Youyou used old written sources in her research. **T / F**

H Complete the email with the correct words from the box.

WIDELY-USED · DENSELY POPULATED · **FAMILY-FRIENDLY** · OPEN-MINDED · BABY-SITTING · WORLD-FAMOUS

Example: Our hotel is **0. family-friendly**, so children are always welcome.

Dear Mr. Okafor,

Thank you for your message about your stay in September. Our terrace looks straight out at the

1. _____ cathedral, which most guests visit on their first morning. If you and your wife would like an evening on your own, we also offer a **2.** _____ service at no extra cost. The old town is **3.** _____, so the streets can get busy in the evening, but the coast road is quiet. The little electric cars you see everywhere are **4.** _____ by visitors because they are cheap and easy to park. Our neighbors are curious, **5.** _____ people who love meeting guests from abroad.

Have a wonderful trip!

Ana Vidal

I Circle the correct word in each pair to complete the text.

Example: A **0. compass** / wire shows you which way is north.

Magnetism is one of the oldest forces people have studied. The metal that reacts most strongly to it is **1. hammer / iron**, and it is also present in **2. compass / steel**, a mixture of metals used in bridges and tools.

Any **3. wire / magnet** creates an invisible field around itself and pulls certain metals toward it. That field is fragile: if you hit the object hard with a **4. compass / hammer**, it can lose its power completely.

The smallest unit of a material is a(n) **5. electric current / atom**. In magnetic metals, these tiny units line up in the same direction, and that is what produces the force.

J Choose the correct answers to complete the sentences.

Example: The final exam was **absolutely** / highly impossible!

1. The map in the app was **completely** / highly wrong, so we got lost twice.
2. We were **totally** / highly amazed that such a small team won the championship.
3. It's **absolutely** / highly unlikely that the museum will open before December.
4. Her father is a **highly** / totally successful architect with offices in three cities.
5. The weather on the last day of the trip was **highly** / absolutely perfect.

K Complete the email using the correct linking words from the box.

LONG · SINCE · **OTHERWISE** · CASE · UNLESS · PROVIDED

Example: Hurry up, **0. otherwise** we'll miss the train.

Hi Marcos,

Everything's fine here — thanks for asking. I'll be at the airport to meet you **1.** _____ that your plane lands before six. If it is delayed, take a taxi and call me from the car. I'm sending you my new number too, just in **2.** _____ your phone doesn't work abroad. You don't have to come to the lab on Friday **3.** _____ you want to — we can easily go on Saturday instead. If you do come, you're welcome to meet the whole team, as **4.** _____ as you're not too tired after the flight. I'll stop here **5.** _____ I still have two reports to finish tonight. Call me if you need anything before you leave!

All the best,

Camila

Should Machines Do Our Traveling?

Every summer the same photographs appear online: crowds pressed against a famous painting, lines of people waiting to photograph a waterfall. It is easy to wonder whether all that movement is really necessary. Some technology companies argue that it is not. With a headset and a good camera team, they say, you can walk through a temple in Kyoto or stand on a glacier without leaving your apartment.

The arguments in favor are not silly. Fragile heritage sites would suffer far less damage, flights would fall, and a virtual visit costs a fraction of a real one. People who cannot travel — because of money, illness or a passport that few countries accept — would finally see places that are closed to them today.

Yet something important is missing from that picture. Millions of families in warm, poor countries depend on visitors for their income, and a headset sends them nothing. Travel also changes the traveler, and no screen can reproduce the confusion of a language you do not speak or a meal you did not expect.

Perhaps the sensible answer is a narrow one. Virtual tours make excellent sense for classrooms, for monuments that are already overcrowded, and for anyone planning a trip. As a replacement for the journey itself, though, they are likely to disappoint.

- | | | | |
|--|--------------|---|--------------|
| 1. The writer believes that virtual tours have no advantages at all. | T / F | 3. The writer thinks a headset would help the economies of poor countries. | T / F |
| 2. Virtual tourism could reduce damage to fragile sites. | T / F | 4. The writer suggests that being confused abroad is part of the value of travel. | T / F |
| | | 5. The writer recommends virtual tours for people who are planning a real trip. | T / F |
